### WHY CLEAN?

Today's electronic devices with LCD screens are compact, lightweight and more user-friendly than the superseded heavy glass screens. But they do require extra care and specifically formulated LCD safe products to keep them operating at peak efficiency.

Regular use of our sachets will maintain effective control of hygiene (disinfect), keep the screen and case dust and fingerprint free and assist in reducing static electricity. This will ensure even more user-friendly usage and will extend the trouble free life of the unit.
